

SBD 100

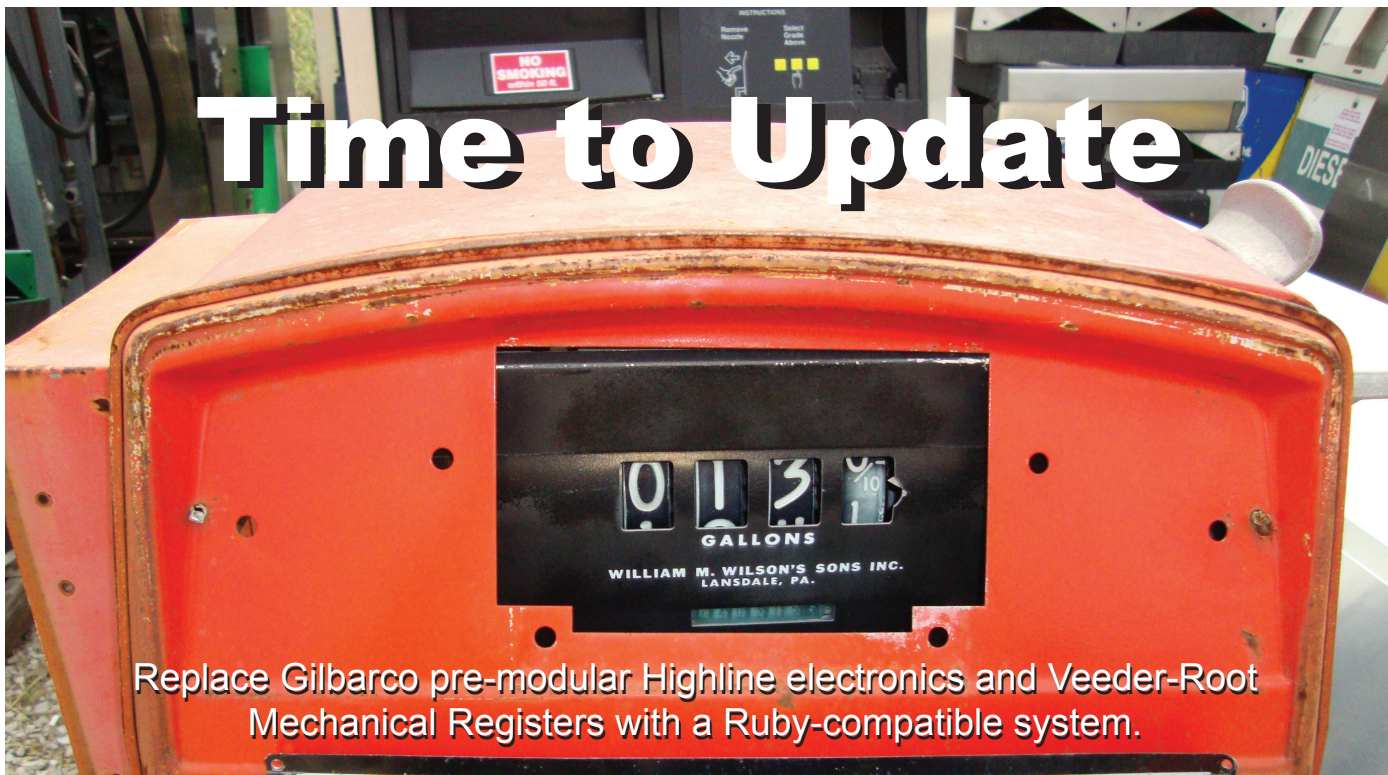

The Complete Package

All SBD 100 systems (formally VRR) come with the necessary mounting hardware, including the board mounting trays, plates, pulsers, barrier pipes, cables and meter connecting hardware. The SBD 100 for pre-modular Gilbarco Highline dispensers use existing Gilbarco pulser and the displays are designed to connect to existing Gilbarco mounting frame.

Time to Update

Replace Gilbarco pre-modular Highline electronics and Veeder-Root Mechanical Registers with a Ruby-compatible system.

Introduces the SBD 100

With the coming PCI requirements, Gilbarco pre-modular dispensers will not be compatible with the new Gilbarco PCI compliant POS systems. The drop-in SBD 100 will allow existing pre-modular dispensers to be fully compliant.

The SBD 100 is also a direct replacement for Veeder Root mechanical computers that can be easily installed in most lighted dispensers or suction pumps. Once installed, the electronics head can communicate (via RS-485) with Verifone Ruby POS cash registers using Wayne, Gilbarco or Tokheim protocols as well as any TMS console.

Features:

- Compatible w/ Gilbarco, Wayne, Tokheim, Bennett Interfaces
- Highly accurate electronic calibration
- Selectable pulse/penny output (10.1, 100.1)
- Change price-per-gallon remotely
- Pricing over \$9.99 per gallon
- Interface with most card and key systems

Other Features:

- National Weights and Measures Approved
- 1 Year Warranty
- Large backlit LCD Display
- Magnetic retrieval of totals
- Non-resettable Electronic Money & Gallon Totals
- No More Lost Money: Inside and outside total sales always match!
- Optional: temperature compensation
- Optional: RF communication
